

DBM-400STR Stacker

The DBM-400STR fits to the right of the collator and is used to stack (straight or offset) each collated set at a maximum of 10,000 sets per hour. The DBM-400STR has a built-in descending stacker which simply wheels away when full.

Features / Performance

Specifications

Model **Type Model Stacker**

Paper Size	Length: 139 to 500 mm
Width: 210 to 350 mm	
Paper Type	Fine quality: 64-125gsm
Art/coated: 104.7-157gsm	
Paper Stack	Straight stacking / Offset stacking
Process Speed	Straight stacking:9,000 sets / h (Not overlapped at the maximum)
Offset stacking:	3,600 sets / h (Not overlapped at the maximum)
Stacker	Elevator stacker
Stack Capacity	Full(Approx. 430 mm), Half(Approx. 200 mm)
Maximum thickness of a set	Thinner than 6 mm (81.4gsm, less than 60 sheets)
Dimensions	<input type="checkbox"/> Main body: 750 (W) x 915 (D) x 890 (H) mm
	<input type="checkbox"/> With LUR: 1, 440 (W) x 915 (D) x 890 (H) mm
*LUR: Lift-up unit for right-side control panel model	
Weight	170kg (with LUR)
